Dear Sir;

Leland Haws is planning to put sprinklers in his ranch up along the Boulder Creek.

He has approximately 2 3/4 second feet of water. When he puts sprinklers in he won't use all this water. He is planning on taking it to his other ranches.

I use the run off from this water. It runs off his land and I put it in a pond and pump it out on my land. I have used this water since 1950. I have had it in a sprinkler system for seven or eight years.

I am writing this letter as a protest. I want him to leave this water where it is.

Yours Truly,

Burns O. Ormond
